Subject Leadership Development

2021/2022

Two half day courses led by one of our SLEs, Lorna O'Dwyer based at Long Sutton Primary School. Lorna has supported a number of schools in developing their subject leaders in order to drive school improvement across a curriculum area and has a wealth of knowledge to share. The 2 half day sessions are designed to support subject leaders to develop a more strategic understanding of school improvement within a subject area. The courses are suitable for experienced subject leaders and those who are new to role.

The 2 half days will focus upon the following areas:

- Leadership skills
- The role of a middle leader
- Developing the tools to systematically monitor and evaluate teaching and learning
- Using data to assess impact
- Action planning
- Understanding the new Ofsted framework

[Developing the tools to systematically monitor and evaluate teaching and learning – 12th October 2021 1.15-4.15pm](#)

The first of the two courses will focus upon the systematic approach needed to monitor and evaluate a subject area. This will enable subject leaders to become more strategic and less operational.

The course will focus upon the following areas:

- The planning of monitoring activities using a monitoring and evaluation schedule
- How to monitor and evaluate teaching and learning
- Ensuring triangulation of monitoring activities
- Drawing conclusions to ensure a strategic approach

This option can be attended as a stand-alone session.

Cost: £50 per person

[Using data to assess impact and action planning – 1st March 2022 1.15-4.15pm](#)

The second of the two courses is designed to develop a detailed understanding of data analysis within a subject area. It will allow those attending the course to be able to identify the strengths and areas for development within a subject, and to develop a strategic action plan which will support school improvement.

The course will focus upon the following areas:

- How to analyse subject data and draw conclusions from it
- How to identify strengths and areas for development within a subject using data
- How to set targets and develop strategic action plans based upon data and monitoring activities

This option can be attended as a stand-alone session.

Cost - £50 per person

Discounted option

Attend both courses and the cost will be reduced to £90.

Covid-19

Covid-19 has obviously had a huge impact upon the way in which schools now work. At the point of writing this programme, we hope that it will be delivered face to face, at Bourne Westfield Primary Academy. We will be monitoring government advice and responding accordingly. Where necessary the training programme may be adapted so that it can be accessed remotely.
